

As a continuation of your previous Task, create two CRUD operation for each user category based on following instruction.

User Category 1:

- Registration
- Login

User Category 2:

- View
- Update

User Category 3:

- View All or View by LIKE primary Key
- View by primary Key AND name (or any other columns) LIMIT 10

User Category 4:

- View All
- Delete

***ALL the features Must follow MVC approach
